

Uploading Files from Your Computer

D2L allows the upload of common file types such as PDF, DOC, DOCX, PPT, and PPTX. These files are displayed within a document viewer in the Content area.

Please note that a module must be created first before files can be added.

1. Go to a module in Content.
2. Select the [Upload/Create](#) [A] button.

Select [Upload Files](#) [B] from the dropdown menu.

The Add a File pop-up window will open. Select the Upload button to locate the file or drag the file from the computer's desktop and drop it within the dotted box.

Select the [Add](#) button.
